

# Product Data Sheet

## SureFlow Clay™

### Description

SureFlow Clay is a proprietary drilling fluid additive blended by DrillRite-Chem LLC for use in all clay formations. When added to drilling fluid slurry, it exhibits unparalleled clay inhibition, sticking reduction, and torque reduction. This product has been field tested with 100% satisfaction by multiple HDD companies in multiple applications throughout the U.S. This product is non-hazardous to the environment.

### Mixing

SureFlow Clay is conveniently pre-mixed and packaged for ease of use. This allows for minimal drilling fluid mixing knowledge, labor, and waste. Use the pre-marked jug label for proper measuring.

Simply add 12.8 oz. of SureFlow Clay along with 1 Qt of PolyRite or VisRite per 250-gallons of water.

Or

After pre-mixing the appropriate amount of bentonite, add 12.8 oz. of SureFlow Clay per 250-gallons of fluid.

### Typical Physical Properties

Form: orange colored liquid

Specific Gravity: 1.1

PH: in water 7.6 - 8.6

Solubility: (Water) Highly Dispersible
